

## Mission Documents

### Step One Print It

Print this document, each page one a single piece of paper. You'll need the individual pages.

The following pages contain the "Training Mission" as well as Mission 1: "Central Station"

### Step Two Work Together

Escape Team is the most fun when played with 2-4 players.

Every mission has different phases. The solution code of each phase must be entered in the ESCAPE TEAM app, in order, beginning with Phase 1.

However, we recommend to spread all of the mission's pages on the table, working on them together in parallel.

### Step Three Be Prepared

Every mission's overview has a list of required material (scissors, pens, ...). Make sure that everything is available. We recommend using colourful, easily distinguishable pens. Also, pencils and erasers could be useful...

### Step Four Get Ready

Start the ESCAPE TEAM app. The game's story is told through audio messages and sounds will notify you of new clues, so activate sound\* on your device. In the app, choose your mission to let your adventure begin.

\*Should you be using an iPhone, make sure to also bring the 'mute switch' on the device's side, right above the volume buttons, into the 'sound activated' position

05

**CONFIRMED**

- ☐ Easy/ [REDACTED]
- ☐ Max 10 Mins
- ☐ 2-4 Players
- ☐ Scissors, Pens, Paper

This is a really easy mission, introducing you to the basics of ESCAPE TEAM. If you do not make it in time, never think about disarming a real bomb...

[REDACTED]

[REDACTED]

832982-3248072390  
ESCAPE TEAM-23486**FOOLS!**

This bomb is disarmed in THREE PHASES. I bet you're not going to finish even the first one. If you really want to try, go ahead. Every single one of my puzzles leads to a FIVE DIGIT CODE for its phase. If you think that you solved a phase, enter its code into the app and confirm it by pressing, OK.\*

\*If you enter a code wrong, there will be a time penalty, of course! Tick-tock!

X = ... - - - - -

We're @playescapeteam on Instagram and we'd love to see postings of you showing how you're having fun with Escape Team. Also, simply email us a link to your posting to mission@escape-team.com and we'll return the favor by sending you six voucher codes for Mission 5: Subway one for you, five for your friends! (Watch out: the voucher codes will only (!) work with Android devices, not on iPhones and iPads. So, if you're an iPhone user: time to invite some friends over, together with their Android phones!)

# Mission 01: Central Station

02

06

Phase  
Two

### Phase Three

Our code consists of the digits 0, 3, 4, 5 and 8. But in which order? The 4 is on the 5's right, but not necessarily directly next to it. 0 and 5 keep a maximum distance. The 3 is between the two numbers that usually follow it. The two digits on the right add up to the same number as the two digits on the left. White Queen from b3 to b5. Black Bishop from f7 to g6.

Do not forget:  
Gamma falls  
onto Kappa and  
Epsilon falls  
onto Beta.

Always consider  
the flipside.

## Phase Two

# Mission 03: Elevator

03

07

Put down the finished cube. The  $\Sigma$  should be facing the ceiling. The north should be pointing away from you. Twist the cube by  $90^\circ$  clockwise. Tilt it onto the side that's in the west. The upward-facing number is A. Twist the west away from you. Tilt the cube towards north, twice. Tilt it towards east, twice, then towards west. Which number is now on the cube's downside? That's B. Twist the south to the right. Tilt the cube onto its left side. C is the sum of the numbers that are visible on the cube's left and right side. Tilt it in a way that hides the 4 underneath the cube. Starting from the now upward-facing number, which number is one step to the west and one more step to the east? This number is D.

1. When the moon stands in Uranus and the sun in south-west, look east.
2. When water stands in Neptune and thunder strikes in the north, look west.
3. When the sun stands in Mars, and the moon in south-east, look south.

4. When the moon stands in Mercury, and water in the west, look east.
5. When earth stands in the north, and the moon in Mars, look south.
